

MORE THAN JUST **PULL HANDLES**

TACO

THE BRAND STORY

I Started business as hardware distributor in Pune and Maharashtra. But then, something caught my eye - the power of a beautiful entrance. And let's be honest, who doesn't love a grand entrance?

But alas, the Indian market was lacking in aesthetically pleasing designer handles. there just weren't enough aesthetically pleasing designer handles to satisfy my curiosity.

So, in 2011, I took the plunge and established a brand TACO - The name derived from initials of my company, Talani Corporation. At first, we focused solely on creating stunning main door handles. But before long, our artistic talents expanded to include wardrobe handles, cabinet handles, knobs, and lever handles. Our designs were an instant hit and the rest, as they say, is history.

The market quickly embraced our designs, propelling us to new heights and then we knew we were onto something. Fast forward to 2018 when we decided to level up our game by setting up a factory in Jamnagar, Gujarat. This strategic decision enabled us to elevate our precision, punctuality, and craftsmanship to unprecedented levels. Today, we are a team of talented artisans who are passionate about transforming your home into a work of art, with not just comfort, but also a touch of sophistication and style.

At TACO, we are more than just a hardware business. - we're in the business of making your entrance grand, your handles stunning, and your homes unforgettable. Our unwavering goal is to continue mesmerizing the Indian Hardware Industry with extraordinary designs and concepts. Why settle for the ordinary when you can experience the extraordinary with TACO?

MANUFACTURING DESIGN CLASSICS

Our approach to design is strong and pure. Products produced by us is meticulous in form, function, feel and construction. Streamlined and without fuss, yet with a smooth tactility that asks to be handled.

Every detail of every Taco piece is rigorously tested for seamless functioning so that it endures. This is why Taco is known for being resistant to wear and tear – for never needing to be bought for a purpose more than once. Because everything designed and tested to the highest technical standards – to be used, turned, touched, pulled, pushed, pressed, flipped and hung from, forever.

Celebrating Women

This beautiful creation of God, the angel on earth makes our life a wonderful experience altogether. This phenomenon rocks the cradle with one hand and the earth with the other. All great men are initiated to the world through her and her teachings. Salutations to this Eternal Wonder!
